Subject: Strategic Review of the Workplace Health and Safety System

To the Secretary of the Strategic Review of the Workplace Health and Safety System:

I am writing on behalf of the Executive Committee of the Melanoma Network of New Zealand Incorporated (IMelNet) to register the Committee's support for the submission from the Cancer Society of New Zealand Incorporated that outdoor workers are a key demographic group at increased risk of skin cancer because of their exposure to solar ultraviolet radiation (UVR).

MelNet is a network of over 500 health professionals committed to the reduction in incidence and impact of melanoma, the most serious type of skin cancer, in New Zealand.

Please do not hesitate to contact me for any further information.

Kind regards,

Betsy
