Subject: Submission please

I would like it mandatory that all central and local government departments have to have at least, a primary ACC WSMP/Partnership H and S system.

I would like audit NZ to have this as a mandatory factor that they use in their audits of government departments as this will ensure a continuous focus on H and S.

As representatives of the Government and its policy we need to lead the way and cascade our commitment down to others that interact with Government.

A first step would be a mandatory audit of all Government (central and local) entities to ask do you have an ACC accredited H and S system.

The survey has to be mandatory otherwise you will get respondents not replying as they don't want to admit under investment in an H and S system.

Regards
